

## CIRCULAR

**FILE:** AP 3/25

**TO:** SPREP National Focal Points  
Pacific Meteorological Council  
Members  
Climate Change Focal Points

**DATE:** 23 April 2021

**CIRCULAR:** 21/28

**SUBJECT:** **Understanding use of weather, climate and climate change services (information & data) for decision making**

Dear Members,

The Secretariat of the Pacific Regional Environment Programme (SPREP) in collaboration with the University of Tasmania: ISF, Commonwealth Science and Industrial Research Organisation (CSIRO), Australia-Pacific Climate Partnership (APCP) and Climate and Ocean Support Programme in the Pacific project (COSPPac) is undertaking an analysis on the use and uptake of climate change and climate services data and information in the Pacific region.

To help us understand how you use weather, climate and climate change services information, I would therefore like to request your support by completing this survey.

The research findings will inform the designs of weather, climate and climate change products produced by national meteorological services to meet the priorities of the sectors (e.g., agriculture, tourism, water etc.) and local communities to better respond to hazards, impacts of climate change and meeting their development needs.

If you want to help inform decision making to build climate resilience across the Pacific, we invite your inputs by completing this [survey \(https://utsau.au1.qualtrics.com/jfe/form/SV\\_3kfnTksJXL21QQC\)](https://utsau.au1.qualtrics.com/jfe/form/SV_3kfnTksJXL21QQC)

Yours sincerely,

Kosi Latu  
**Director General**
