SUBJECT: Invitation to attend the Signing of the Pacific Climate Information Services and Application (ClimSA) Project & Launching of the Pacific Meteorological Council 10th Year Anniversary
Blended Platforms – Pacific Climate Change Centre and Virtual (via Zoom)
1.00-3.00pm Samoa Standard Time

9 July 2021

Dear Directors and Partners,

I am delighted to invite you to attend the **Signing of the Pacific ClimSA project & Launching of the Pacific Meteorological Council 10th Year Anniversary**. The event will be hosted through a blended platform - face to face and virtual (via zoom) for participants outside of Samoa.

Pacific National Meteorological Services are the pillar of weather, climate and climate change science to predict and forecast weather, climate, ocean and water related hazards in our countries. The Pacific Meteorological Council (PMC) was first established in 2011 as a subsidiary body of the Secretariat of the Pacific Regional Environment Programme (SPREP). Since then, PMC has increased in number of partners and members as the demand for weather and climate information increases with climate change.

The celebrations will commence with the formal signing of the 9 Million Euro Climate Information Services and Application Project (ClimSA) and the launch of the PMC 10th year anniversary logo.

As committed partners and donors of the Pacific Meteorological Council over the last decade, I hope that you will be available and willing to attend this important event.

To confirm your participation please send an email to azarelm@sprep.org and copy PacMetDesk@sprep.org by **Wednesday 7 July 2021**. For additional information related to the Pacific Meteorological Council please see link to <https://www.pacificmet.net/pmc> and the programmed is also provided for your reference.

We look forward to hosting you in-person and virtually.

Yours Sincerely,

Kosi Latu
Director General
